IDENTIFICATION

Captured search occurrences identified
n = 18,371

Duplicate occurrences removed
n = 8,281

Records after global deduplication
n = 10,090

Other pre-screening removals
n = 3

SCREENING

Records screened
n = 10,087

Excluded during screening
n = 9,621

Retained report records
n = 466

Alternate versions consolidated
n = 87

Reports sought for retrieval
n = 379

Reports not retrieved
n = 1

Reports assessed for eligibility
n = 378

Full-text stage reductions
n = 93: 10 versions + 83 exclusions

Studies entering final review
n = 285

Final-review exclusions
n = 63

INCLUDED

Main CUA corpus

n = 222 studies

Literature supplementation

n = 46 sources

34 post-cutoff studies
12 foundational sources

TDES supplement

n = 9 sources

4 academic sources
5 official documents

Final evidence source base — n = 277 sources

260 academic studies + 12 foundational sources + 5 official documents
